PROFESSIONAL SUMMARY

Computer Engineering graduate with experience in data science, machine learning, data analytics, and database-driven applications. Developed projects using Python, SQL, PostgreSQL, scikit-learn, Streamlit, Flask, and Tableau. Focused on data preparation, model development, visualization, dashboard design, and user-oriented software solutions.

TECHNICAL SKILLS

Programming: Python, SQL, Java, C

Web & Design: Flask, Streamlit, HTML/CSS, UI/UX

Databases: PostgreSQL, Database Design, ER Modeling

Data Science & ML: Pandas, NumPy, scikit-learn, SHAP, Matplotlib

Software Practices: Git, GitHub, Data Preprocessing, Model Evaluation

Visualization & Tools: Tableau, Dashboard Design, Jupyter Notebook

EXPERIENCE

Intern | TÜBİTAK UZAY | Jul 2025

- Contributed to API operations, user interface development, and database design processes.
- Gained hands-on experience in backend structure, data flow, and interface-database integration.

EDUCATION

B.Sc. in Computer Engineering | Alanya Alaaddin Keykubat University | 2022 - 2026

Relevant focus: data science, machine learning, database systems, software development, and data visualization.

SELECTED PROJECTS

Explainova - Explainable Machine Learning Platform | [Python](#), [Streamlit](#), [scikit-learn](#), [SHAP](#)

- Developed a web-based platform that enables users with limited technical background to analyze tabular data and compare ML models.
- Contributed to preprocessing, classification/regression workflow, SHAP, PDP/ICE outputs, and reporting steps.

E-Commerce Data Analysis and Dashboard | [Tableau](#), [Data Analysis](#), [Data Visualization](#)

- Cleaned e-commerce data and prepared an interactive Tableau dashboard to track sales, customer, and product performance.
- Built a reporting structure that supports decision-making with KPIs, filters, and visual analysis.

Online Reservation and Order Management System | [Java](#), [PostgreSQL](#), [SQL](#)

- Designed a relational database for reservation and order processes; created normalized tables and SQL queries.

Student Attendance Tracking System | [Python](#), [Flask](#), [PostgreSQL](#), [ZeroMQ](#)

- Developed a real-time student attendance tracking system using ZeroMQ-based messaging architecture.

CERTIFICATIONS & PROGRAMS

Certifications / Programs: Samsung AI Course; 100 Days of ML - Udemy; Software Testing - Udemy; UX-UI 101; Womomentum Training Program - Enerjisa Üretim & imeceLAB. **Language:** English B2.
